The Subject is 'SHADOWS' for all age groups:

Take a look around and see, in sunlight just about everything will produce a two-dimensional silhouette, that is 'to cast' a shadow. People, trees, buildings. A ball, a feather, a floating balloon. What colour is a shadow? Why? Does the same happen in moonlight? Is a ghost a shadow? Is there more than one meaning to the phrase 'Someone's Shadow'? So much to explore

Use your time at home to come up with some great shadow ideas. Bright days in the garden will give you shadows of your pets, trees, plants and pots. The later in the day, the longer the shadow. Bright sunshine shining through the windows into rooms give great shadows

We remind all photographers to follow published and parental guidance about protecting themselves from Coronavirus and staying safe while seeking out that winning photograph
